

simple daily git workflow

git pull

pull all the changes from the remote repository

git checkout -b branch-name-here

create a new branch for your bug/feature/issue

DO YOUR WORK HERE

keep it in small chunks, the smaller your commits the better, in case things go wrong

git add .

and any new files you've created

git status and/or git diff

see the changes you're going to commit

git commit -m "Detailed message here"

make the commit with a nice detailed message

git checkout master

switch back to the master branch when the feature is done, your tests pass right?

git merge branch-name-here

update the master branch to update the master with all your changes

git push

send your changes up to the remote repository

commit loop

feature loop
